

**INSTRUCTIONS FOR USING THIS HANDBELL ARRANGEMENT
OF**
Did You Think to Pray?

1. Print out the pdf pages with the handbell chords on them. These can be placed in page protectors and then in a binder to be used as a flipchart. They could also be posted in order on a white board.
2. The children should be aware that it is a privilege to use the handbells and they should be used carefully. Pulling on the white ball in the middle could stretch the springer and distort the sound.
3. The colours of the images in our pdf charts correspond to the colours of the KidsPlay brand handbells.
4. Children should ring their bells when they see the corresponding bell on the chart.
5. They should be careful to silence their bell by placing it gently against their chests - and the bells not showing on the chart should not be rung.
6. The handbells can be rung on just the first beat of each measure, on every other beat, with the beat, with the rhythm or just rung freely while their bell is shown... that works too. :)
7. The music leader could also have the children play along with the video. In our video on the “get” part of the word “forget” in the second to the last measure, we have added the 7th (A) to the Bflat chord at that point. It is optional.
8. Have fun!
